

# PIPELINE PILOT UPGRADE ASSESSMENT SERVICE

Pipeline Pilot provides value to scientists, R&D management, developers, and IT professionals across research, development and manufacturing in many science-based industries. The platform and component collections are frequently updated to provide access to new technology and enhanced scientific functionality to maintain the most comprehensive informatics environment in the industry.

To ensure customers can easily take advantage of all Pipeline Pilot capabilities and enhancements, the Accelrys Professional Services team now offers a Pipeline Pilot Upgrade Assessment Service.

## THE PIPELINE PILOT UPGRADE ASSESSMENT SERVICE

By leveraging the experience of Accelrys' Professional Services team, existing customers can smoothly transition to the latest version of Pipeline Pilot. Accelrys will provide a plan with a schedule and resource framework that will minimize mistakes, a need for rework and costly implementation errors that typically accompany any software upgrade. The Upgrade Assessment Service is a fixed fee professional services engagement, based upon a standard Statement Of Work, that delivers:

- A quantified list of upgrade activities
- An estimated level of effort for an upgrade; costs and timelines
- A plan for implementing the latest version of Pipeline Pilot

The Upgrade Assessment Service offers a functional and technical assessment to help pave the way for a successful upgrade project.

## WHY DO-IT-YOURSELF WHEN YOU CAN LEAVE IT TO THE EXPERTS?

Understanding that clients may have limited IT resources or Pipeline Pilot upgrade experience,

our experts will assess your unique Pipeline Pilot environment and develop an implementation plan that will enable quicker access to the newest enhancements. As a result, your internal implementation team will have a clear step-by-step upgrade guide, improving their productivity and avoiding potential costly mistakes. Throughout the assessment, the Accelrys team of experts may also identify opportunities to leverage your implementation to address other scientific, technical and business challenges.

A dedicated Accelrys assessment team with extensive solution, industry and upgrade expertise will be assigned and serve as a single point of access to Accelrys consulting, education, support, custom development, and hosting expertise.

**To get started on your Pipeline Pilot Upgrade Assessment, contact your Account Manager or email us at [consulting@accelrys.com](mailto:consulting@accelrys.com).**
