

PROCESS INFORMATICS FOR MANUFACTURING

DATASHEET

BIOVIA Discoverant integrates powerful investigational analytics with a unique data modeling technology to provide real-time, on-demand data access, analysis and reporting of manufacturing and process development data.

Process Informatics Software

- Accelerates products to market
- Improves manufacturing and supply chain efficiencies
- Reduces the cost of quality
- Satisfies regulatory obligations
- Increases process predictability

BIOVIA Discoverant maps data-type and batch relationships from your existing systems—including BIOVIA Laboratory Information Management System, HIST, EBR/MES, ERP – even data from paper records.

Aggregation

BIOVIA Discoverant then provides real-time, on-demand access to your data in a user-friendly, point-and click environment, allowing you to better understand and control sources of variability.

Analytics

Finally, the powerful analytics and reporting tools allow you to perform accurate cause-and-effect analyses to pinpoint the root of the problem.

BIOVIA Discoverant is a component of the BIOVIA **Process Management and Compliance Suite**, a comprehensive software offering for capturing, managing and analyzing development and process data in new product development and commercial manufacturing and quality operations.

Our 3DEXPERIENCE Platform powers our brand applications, serving 12 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the 3DEXPERIENCE Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 170,000 customers of all sizes in all industries in more than 140 countries. For more information, visit www.3ds.com.
